Reconstructive breast surgeons, along with other members of the UCLA healthcare team, will present reconstructive options available to women following a mastectomy. Women who have undergone post-mastectomy breast reconstruction and prophylactic mastectomies will discuss their experiences and provide peer support. A mini health fair will provide attendees with a wide variety of educational materials.

BRA Day USA is just one piece of the ongoing campaign to help support women physically, mentally, and emotionally in their fight against cancer. We hope that you will join us.
